To the READER.

Candid Reader,

THE Regal Psalmist thus exclaimeth, *Psalm 19. v. 1. The Heavens declare the Glory of God, and the Firmament sheweth his handy-work.* And Ver. 2. *Day unto Day uttereth Speech, Night unto Night sheweth Knowledge.* It appears that the great Creator of Heaven and Earth, in his infinite and most unlimited Wisdom, hath placed more Delight in Man, than in all the Works of Creation besides; for he hath given him a Face to look upward, and so hath attracted his Aspect Heaven-ward, that he might the more seriously meditate on this Expansion of Glory, and by that contemplate the unspeakable Excellencies of the Divine Majesty: Can it handsomely be thought, that God made this Glorious Canopy, only to gaze on, but to contemplate and study: For indeed Man doth most of all appear to be the Image of God's Workmanship, when he doth meditate on his Works, viz. The Works of Creation, and the Works of Providence. First, The Works of Creation, shew the Power of God, in making all Things of Nothing by the Word of his Power. Secondly, The Works of Providence are his wise and powerful Preserving and Governing of all his Creatures. Hence are the most Glorious Attributes of the Divine Essence displayed, as his Infinite Wisdom, Glory, Goodness, Power and Immensity. And from hence do appear most clear and convincing Arguments to prove the Existence of God, which the wanton and prophane Wits of the subtlest Atheists in the World can never evade. For is it not absurd and ridiculous to think that all Things in this World happened by Chance, or that there is neither Method nor Order in the Influence of Heaven? Or to affirm that a fortuitous meeting of Atoms stretched out the Heavens, and adorn it with those glorious sparkling Diamonds, the Stars? Which tho' the Air we breath in be full of them, yet they tend to nothing but to make us wink; neither incline they to take any form. Notwithstanding it is about six thousand Years since the Creation, yet they have not produced the least Trifle in Nature. And as *Ptolomy* teacheth, *Hanc unam scientie esse viam ac semitam ad sciendum Deum Altissimum.* This one Science is the only Way and Path that leads to the Knowledge of the high God. Happy must that Man be, that truly understands that God Almighty is pleased by the Agency of the Stars and Planets to shew the various Acts of his Providence on this Terrene Globe, sometimes to the pleasing, other times to the amazing wonder and startling of Human Ears.

Your Servant, *Job Gadsden*

January hath XXXI Days.

On the First Day of this Month is Celebrated the Feast of the Circumcision of our Saviour, who, for the Good of Mankind, became Obedient to the Law. And in Imitation of the good Gentiles we still preserve the good Custom of sending and receiving New Year-Gifts, that, by such Correspondency, Love and Affection may be the better maintained among Men.

Non nobis nati sumus.

Let us all Petition at the Throne of Grace, that God would be pleased out of his Infinite Mercy, to grant Peace and Tranquility to *Europe* in general, and to *Great Britain* in particular; and that Divine Providence may shower down its Blessings upon the Head, and into the Heart, of our Sovereign's Queen *ANNE*, and make Her still (as She is) a Nursing Mother to these Nations: Give Her Victory, and Crown Her with Triumphs.

The Year begins with a Cardinal violent Quadrate of *Mars* and *Jupiter*; *Mars* in Square, and *Jupiter* in Opposition to the great Conjunction in the Year 1702. It may be justly fear'd that there is some Devilish Designs a contriving in some Neighbouring Countries. Let those under *Libra* and *Capricorn* look to it, and those under *Aries* and *Cancer* too; for they seem to be menaced. But the Trine of the ☉ and ♃, and △ of the ☉ and ♀ make full Discovery. So the Fools go on till they are punished.

February hath XXIX Days.

On the Second of this Month is celebrated the Purification of the Blessed Virgin, who submitted to the 40 Days Ceremony, according to *Moses* Law, as the meanest of Women. It is also called *Candle-mass*; because, among the *Romans*, it is observed with great many Lights in their Churches all the day long, in Honour of our Saviour, that was the true Light of the World.

Our Gracious Sovereignest Queen
 A. N. B. was Born the 6th day of Fe-
 bruary, Anno 1662.

*Da spatium Vitæ, multos da Jupiter Annos.
 Imperium Oceano, famam qui terminet Afris.*

The Councils of Europe are very close
 and intent upon their Designs; and the
 Consultation now in hand, and under
 consideration, are of great Consequence.
 What the issue of Things will be, you
 will hear in a little time. At the Syno-
 dical Lunation, Saturn is in the medium
Cæli significat merorem ac tristitiam. So
 that the Effects of these Consultations,
 seem to be carried on with great Doubts
 and Difficulties; so that Great Men fall
 at Difference and Animositities. The Sun
 in Pisces, and Mercury in the same Sign
 in Quadrate of Saturn, occasion many
 Scandals, &c. against Men in great Places
 and Authority. Let us be careful, and
 beware of pretended Friends. Great
 Men find Trouble in this World as well
 as the Poor. The French King is me-
 lancholy and anxious.

March hath XXXI Days.

We celebrate on the 25th day of *March*, the Feast of the Annuntiation of the Blessed Virgin, in Honour of the Angel *Gabriel's* Divine Message unto her, *viz.* That she should conceive in her Womb, and bring forth a Son, whose Name shall be called *Jesus*, and He shall be the Saviour of the World.

On the 8th day of March, 1708, our Gracious Sovereigns was promulgated Queen of Great Britain, France and Ireland.

No Nation under the Sun could be more happy, if the great Commandment of our Lord and Saviour were but sincerely observed amongst us, that is, *Love one another*. We have great hopes that now things are composed and put into a very good Order, to the general Satisfaction of all the Nation.

Poor *Jupiter* is Retrograde, and in his Detriment, and opposed by the *Sun*. This should indicate as if some great Clergy-man, or Lawyer, falls under the Frowns of his Prince, for being too diligent in contriving how to censure, if not to oppose the Actions of their Superiours; but by the means of some great Woman he is got into Favour again.

April hath XXX Days.

In this Month (for the most part) is celebrated the great Feast of *Easter*, in Honour of our Saviour's Resurrection, after his Crucifixion, for the Sins of Mankind. *Blunt* says, *Easter* is so named of *Eoster*, a Goddess of the old *Saxons*, whose Feast they kept in *April*. And at this present, in *Saxony*, it is called *Ostern*, which comes of *Ostern*, their, and our old Name of *April*; in which Month this great Festival commonly happens; but sometimes (by reason of the *Moon's* motion) it falleth out in *March*; though not often.

On the 23d day of April, Anno 1708, our most Gracious Sovereigness Queen ANNE, was Crowned Queen of Great Britain, France and Ireland, &c. At which Glorious Solemnity, the most Reverend Arch-Bishop of York Preach'd the Coronation-Sermon: His Text was, *And Queens shall be your Nursing Mothers.*

France! Tumults, Uproars and Insurrections is like to be part of thy Portion; and thy Territories seem to be full of Confusion, and thy Princes is plunged into many Misfortunes both of Body and Mind. For ♀ was all the last Month in square to his Radical ☉, and ♂ in this in ♂ to it. This will give him ill Success in his Affairs and Negotiations, Poverty and Distractions, with inroads into his Territories, and his People ready to rise in Rebellion. ♀ Retrograde in his M C. can do him but little good, nay, rather harm, as he is in Opposition to ♂: For this Opposition incenses the Clergy of France against him, and make them very uneasy; and perhaps some of them may endeavour to give him a Dose.

May hath XXXI Days

The Feast of St. Philip, &c. is observed the First of May; but you must know that this was *Philip* the Apostle, not the Deacon. This *Philip* Preach'd the Gospel in *Sythia*, and in some parts of *Aethiopia*, and at length went into *Phrygia*, where he both preach'd and wrought Miracles; notwithstanding which, they at last Imprison and Crucify him; viz. *Anno Christi* 54. on the Calends of May.

Mars in *Aries*, in his own Domal Dignities, declares the Souldier active; and being also upon the place of the great Conjunction in 1702, shews that in a very little time we shall hear of some extraordinary Feats of War performed against the Enemy of *Christianity*. For *Mars* passing by the place of the great Conjunction aforesaid will help to stimulate the Effects of that Conjunction, and of the late Square of *h* and *♂* from *II* and *♂*, and likewise the *♂* of *♂* and *♂* from *ix* and *♂*. These Configurations shew the Sword to be still rampant. *France* and some other Countries mourn under the sad Effects of War: Portends great Sorrow and Affliction unto such Persons as inhabits those Countries subject to those Signs. Here's the appearance of great Armies, and of brisk and bloody Actions among them: Strong Sieges, much Rapine and Plundering, to the Ruin of many Families: Which we may probably hear of in a little time.

June hath XXX Days.

The 24th day of *June* is dedicated to *St. John Baptist*, the Forerunner of our Blessed Saviour, who was this Day born of his Mother *Elizabeth*, according to a Promise made by an Angel to *Zachary*, as he (being a Priest) was offering at the Altar.

This Month is attended with variety of Configurations of the Planets, whose Effects shall be very various.

The Conjunction of the Sun and Saturn and the Conjunction of Saturn and Mercury with other Configurations, from whose Influence nothing but mischief and cross contradictory Actions can be expected. Saturn in Gemini, saith Argol, dat animum maledicum invidum, &c. giveth, a railing, spiteful, and envious Mind. And if he be thus mischievous in each single persons geniture, we can expect no less from him in general configurations. And as he is in Gemini in Aspect of so many Planets, viz. the Sun, Mercury, and in Square of Jupiter; this poisons our hopes of Happiness, and defeats our likeliest expectation of Good, and destroys the friendship of one Man to another. A troubled fear possesses the Generality of Men, for the Spleen offends the Heart with its poisonous effluvia.

July hath XXXI Days.

The 25th Day of this Month St. James the Apostle suffered Martyrdom, by being Beheaded Anno Christi 43. His Courage was great, that when going to his Execution, he behaved himself so undauntedly, that, by his Resolution and Courage, he converted the Informer, that was the Instrument of his End, so that he asked him Forgiveness, and became a Co-partner in his Sufferings.

At the beginning hereof things appear with a moderate Aspect; but we shall find that there is nothing permanent under the Sun.

At this Lunation ♄ is in the seventh House, the House of Contentions, Quarrels, Controversies; and being in square to ♄, and he in the Ninth, he declareth the breach of some League, or the beginning of some new Difference or Contention, it should be about some matter in Religion, or Things, and Men of that Nature. And as ♄ is in *Domo Contentionis*, so it may relate to the Differences between Kingdom and Kingdom, &c. The double square of ♂ and ♀ will produce much lying News abroad in the World, and scandalous Pamphlets promoted to the Prejudice of many Persons of Note.

August hath XXXI Days.

On the 24th of *August*, the Feast of *Sr. Bartholomew* is kept. He was by Birth a *Syrian*, and (tho' Nephew to a *Syrian King* yet) by Profession a *Fisher-man*; after he had Preach'd the Gospel to the *Indian* and *Armenian*, &c. he was *Anno Christi 51*, on this day, first stoned, then excoriated, and so left hanging upon a Cross until the next day; and then, to end his Torments, they beheaded him.

The Heavens seem at present to be harmonious, and to represent the Actions of Mankind in a hopeful way of Reconciliation: If it were not for the Cardinal Platick Square of *Saturn* and *Jupiter* we might be happy. Now every one is for driving on his own Interest, and every Agent vigorously endeavours to promote his own clandestine Designs. *Mars* in *Gemini*, swift in motion, creates Trouble to a great City in *Europe*, and irritates her Sons of Discontent. God preserve us from fraudulent Actions, and casual Fires, or other malicious Contrivances, that tend to the Disturbance of the Publick Tranquillity. Several Cities in *France* are subject to divers Calamities, as well by Oppression as Sicknefs.

September hath XXX Days

On the 21th of September is kept the Feast of St. *Matthew*. He was the first Evangelist, and wrote the Gospel of his Master in the *Hebrew Tongue*: He Preached the same all over *Pontus* and *Asia*; and afterward in *Ethiopia*; among which Black People he continued Twenty Years; yet they at last, in a barbarous Requital of all his Care and Pain, Beheaded him *Anno Christi* 71.

Observations.

The third day of this Month, in the morning, the Glorious Lamp of Heaven will be forced to wear a Beauty-spot, God preserve us from Epidemical Diseases, or great Mortality; the Conjunction of *Saturn* and *Mars*, and the Cardinal square of the *Sun* and *Saturn*, with other concomitant Configurations, doth pre- sage. The Cardinal square of *Saturn* and *Mercury*, and of *Mars* and *Mercury*, im- ports many wicked Plots and crafty De- signs, carried on in several Countries; several wicked things are a contriving, as false Evidences, and projecting of o- ther malignant Devices, which will be brought to light, and the Actors of them punished. This affliction of ☿ threatens Mercurialists with the Frowns of their Friends, and in danger of losing their Employment, many Officers turn'd out of their Business; also it threatens Mecha- nicks with the Loss of Trade, and so gives occasion for the Poor to complain for want of Business; and it will be well if the Merchant has no occasion to com- plain too of his Losses.

Many are the benevolent Configurations of the Planets this Month, and the Heavenly Bodies appear in great Harmony: From hence a hopeful Unity may now be expected amongst us, if the late Square of *Mars* and *Jupiter* doth not impede; for it is from Cardinal Signs, and denotes Difference among Great Men. Many undergo the severe Checks of their Superiors, and many hot spirited Persons cast many unjust Reflections upon the Reverend Clergy, and by such means expose themselves to publick Shame and Infamy, whilst the prudent and honest Man will be sure to keep within Bounds, and often check their most extravagant Passions and Inclinations; and after this manner doth the Wise Man rule his Stars. Many grave and sober Consultations for Peace; and many labour for reconciling of Differences. Blessed are the Peace-makers.

November hath XXX Days.

The 30th day of November is kept the Feast of St. Andrew. He was the first Christian, and first-born of the New Testament. He preached the Gospel in *Scythia, Bythinia, Galatia, Macedonia, Thracia, Thessalia, and Assoia*; where at length he is taken, and Anno Christi 80. under the Emperor *Vespasian* is crucified, with his Head downward, as was St. Peter.

The Trine of the *Sun* and *Mars* denotes some great General, or Commander, now to meet an unexpected Advancement, and in a little time is in danger of losing it again; for *Mars* soon after turns Retrograde. Some Great Persons Affairs are at a stand, they know not what to do.

We of *Great Britain* are in as hopeful a Condition, could we but see it, and be thankful, as any Nation in *Europe*; and our Persons, Estates and Liberties, are safe and secure under a most Gracious Queen. Some Great Person variously censured, and some of the Long Robe render'd contemptible: And sundry worthless Persons requite their Benefactors ill. But let such know, they that sow the Wind, do commonly reap the Whirlwind.

December hath XXXI Days.

The 21th of *December* is kept holy to *St. Thomas* the Apostle, who was, *Apoſtolus Indiarum*, the Preacher of the *Indies*. He converted many to the *Chriſtian Faith*, yet is himſelf, in the Year of *Chriſt 35*, put to Death, even by thoſe People that he laboured to bring to *Eternal Life*.

Heavens bless and direct the Great Councils of this Nation, in their most serious Consultations and Debates; for malicious Endeavours are used secretly to divide them: For the Opposition of the *Sun* and *Saturn*, and the Opposition of the *Sun* and *Mars* imports no less. Where Great Councils are, there will be great Clashings and Contradictions, one Faction opposing another, and every one driving on their own Interest, to the Prejudice of the Publick. Many sudden and unexpected Accidents happens at this time, costing many Men their Lives, or Liberties at least. *Mars* retrograde in *Cancer*, and in Opposition of the *Sun* shew some great Man, Commander either in the Army or Fleet, to lose ground, and to be under the Frowns of his Superiors. A dire Cup is providing for some Northern Nation; for *Mars* hath been transiting for these four Months up and down in *Cancer*, and almost four Months it will be ere he gets out of it.

Whom GOD preserve			

See here a Race of England's Glorious Kings,
All which have done or suffer'd mighty things,
So left the Throne whereon Just Anna's set,
To out-do all that ever reigned yet.
May Anna's Glories scale the Azure Sky,
And make her Name to reach Eternity.

This Figure hath fixed, and bycorporeal Signs occupying the Angles. It is very observable that the Moon in this hybernical Scheme, is in a bycorporeal Sign, and applying to an Opposition of *Saturn*, and a Conjunction of *Mars*, and that from Angles. And when *Saturn*, shall be in Opposition of the Moon, he is an Enemy to the Popularity in general, and to all human Comforts: He denotes a Rot or Destruction of the common vulgar People by some Epidemical Diseases, &c. Many Insurrections, Mutinies and Disturbances among them, with sundry Discontents and Sufferings; he signifies Sterility, and want of things necessary for the support of Life: He is the grand introducer of Melancholy and all troubles arising thence, the very Poisoner of all mundane Felicities.

The second thing that is observable here in this hybernical Scheme is the *Moon* going to the Conjunction of *Mars*, and he in the tenth House. Hear what an Author saith of *Mars* being in the tenth House. *Bonatus pars IV. cap. 85. Et si fuerit in decima, significat Tribulationem venturam Rusticis atque Popularibus, ex parte Regis vel Divitum ac Potentum: & significat Vulnere & percussiones Gladiorum, atq; Flagella & Angustiam ex eis, atque Carcerem & penuriam seu indigentiam Victualium: Et significat Bella & Contentiones de rebus, quæ non sunt illorum qui petunt eas, nec pertinent ad eos.* And if he shall be in the tenth House, it signifies Tribulation to the common sort of People, from Kings, Potentates, great and Noblemen that are over them; some fall or at least wounded by the Sword; some endure other extremities of Punishment and Sorrow, some suffer Imprisonment and want of Viſual: It signifies also Wars and Contentions raised about Matter and Things, by them that have no Right or Title or Interest to or in them. The Conjunction of the *Moon* and *Mars* may denote some rash Attempts, or popular Tumults; at least-wise it gives many Discontents and Discords among the Vulgar. The Diseases that are like to be incident to this Quarter, do originally arise from Gluttony, Surfeiting, or over-much Repletion, causing high Fevers. coming of Choler, a flux of the Belly, with a defluxion of thin, sharp and subtil Humour, causing Pain in the Joints and Arteries, Fever, extremities of Heat and Cold.

The Vernal Scheme.

THE Spring, the most delightful Season of the Year, commenceth always when the glorious Lamp of Heaven, the Sun, touches the first Scruple of *Aries*, the first and chief Sign of the Zodiack; at which time all things begin to look fresh, and flourish; the Strength of Men, as well as the Year is then renewed: Day and Night being of equal length now at this time, as the Night loseth her Regency, the Days increase, and shew a happy Resurrection of all things growing upon the Earth. This delightful Quarter beginneth this Year on Tuesday the 9th of March at 12' 25" past Noon, and then the Heavens are posited as above.

At this vernal Ingress we find all the Angles moveable which denotes the Celerity of Action. In this Equinoctial Scheme the Moon is applying to a Quartile of Saturn; this Position doth also shew a kind of unhealthy Season, it signifies

bes some Epidemical Diseases, as Fevers and Agues, with Coughs and Distempers of the Lungs, &c. The Moon, Lady of the Ascendant in Quartile to Saturn Lord of the sixth, seventh, and eighth Angles, denotes a mortallity of many old People, and Mars being in *Domo Mortis*, there shall happen many sudden and violent Deaths. And as Saturn is Lord of the seventh, and in Square of the Moon, so he portends Quarrels, Strife and Contention, and Animosities amongst the People.

Si Mars fuerit in Aquario (saith Bonat. fol. 573, as now he is) *significat Gravitates atque Tribulationes venturas hominibus, & abundabunt Nives & Pluvie, & frigus in suo tempore, sive suis Temporibus minuetur Annona & Vinum atque Butyrum in partibus occidentalibus, & in Terra que dicitur negotiatorum, & significat Mortem sive Mutationem Regis sive Dominatoris illius Regionis in qua tu revolveris Annum.* If Mars shall be in *Aquarius*, he portends grievous Afflictions and Tribulations shall come upon Men; and that as Snow, Rain, and Cold shall abound in their Seasons; there shall be great scarcity of Provision for Men and Beasts, as also of Butter, and the like in those Western Parts, from whence it was formerly transported by the Merchant; either the Death of the King of that Country where you set that Revolution, is to be feared, or some Mutation of principal Governor. The Places concerned in this are *Tartaria, Walachia, Muscovia, Swedeland, Westphalia, Piedmont, Bavaria, &c.*

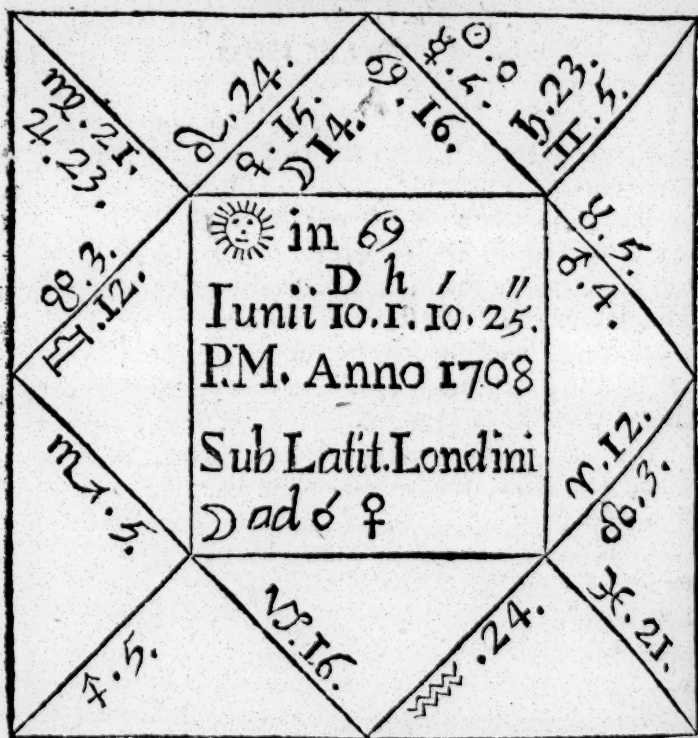

My Cousin saith, that Saturn in the eleventh House, which is the second from the tenth, so he signifies an ebb in the Exchequers or Coffers of Emperors, great Princes and Potentates, Dukes, Earls, Lords, &c. and renders them in this Year to be in great Want of Monies, &c. And if any of them happen to be Saturnine too, or to have Saturn placed in the second of their Nativities, then will they be subject to very great want of Treasure in earnest; and many of their greatest Designs, whether martial or civil, foreign or domestick, will not only want their wished Success, but strangely miscarry thereby, to their extraordinary Loss and Damage. Here you are to note, that, That which signifies the loss of a Law-Suit, or a petty Debt, or damage by Thieves, Shipwrack, Fire, or the like, to a private Man; signifies to a Prince or Emperor,

Inva-

Invasion of part of his Territories, the loss of a Plantation, Army, Town or Towns, &c And as it is like to fare in this matter with Potentates and great Persons, so also it will prove unto Men of meaner degree, viz. to the Commonalty in general; as *Mars* Lord of the tenth in opposition to the second House, most aptly denotes. Nor is this unhappy Menace meanly, but eminently exaggerated by the *Moon* her being in Quartile of *Saturn*. But all these things to happen unto such as live Eastward or South East from Great Britain.

Summer Scheme.

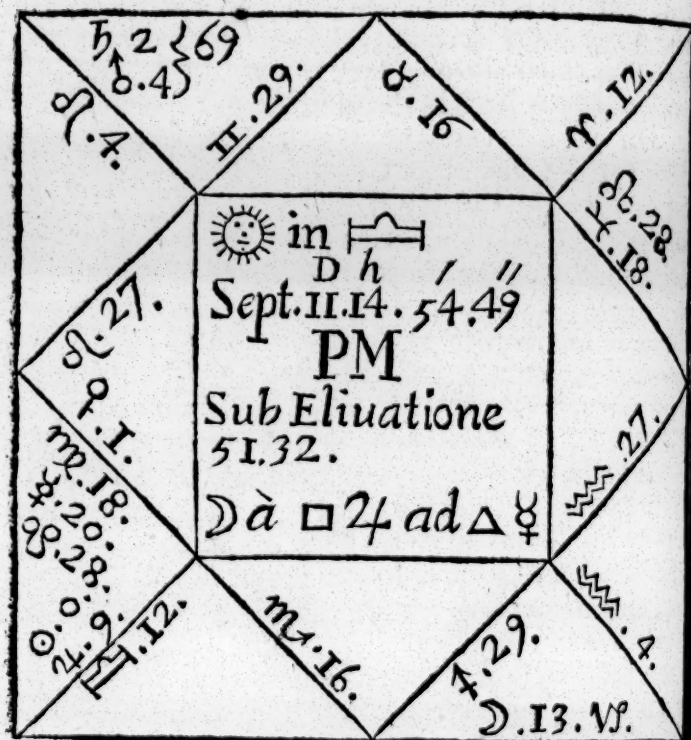

Here are Cardinal Signs possess all the Angles, which sheweth the transcendence of Action all over Europe. The Square of *Saturn* and *Jupiter* have a large Share in the Action and Affair of this Quarter. *Saturn* in the ninth House, and *Jupiter* in the twelfth, and in Quartile, as aforesaid, signifies Wars and Controversies, many tedious Law-Suits, Commotions, Seditions, Troubles, the over-

throw of some King, or Kingdom, or State; alterations of Laws, Customs, Privileges, and Rights; Treacheries, Treasons, Anxiety and Trouble, grievous Infirmities, and Men shall sustain much Sorrow, Losses, and Crosses, and Vexation. *Saturn*, as he is in the ninth House in combustion of the *Sun*, signifies contrary Wind, foundring of Ships, Leaks, Pyracies and other Casualties belonging unto those that navigate the Ocean; it manifests that long Voyages shall be unprofitable, and that they will prove rather to the Detriment and Damage than Profit of the Merchant or Owner. In the preceding Lunation we have four Planets in Conjunction in *Gemini* in the tenth House, viz. *Saturn*, *Sun*, *Mercury*, and the *Moon*.

Bonac. fol. 566. *Saturnus in decima, significat Mœrorem, ac Tristitiam, & Attractiones, & Gravitates ex parte Regis, seu Potestates, & Perplexitates Carceris.* It signifies Grief and Sorrow and Heaviness, and the Perplexity of a Prison, by the means of some King or Potentate. For it doth always bring Trouble and Perplexity to that Person or Kingdom concerned in its effects. *Mercury* is Lord of the tenth House, and in Conjunction, of three Planets in it. There is some plotting and contriving work going forward, and it is very probable we shall have some discovery of some State Intrigues, and some underhand Dealing will be in a little time brought to light, in some Countrey of *Europe*, and the Actors thereof severely punished, for they are all in Combustion. Such rebellious Spirits as will not love, obey, and submit to Authority, will be constrain'd to fear it, and feel its coercive power. For certainly many great things are in Agitation, as will appear in a short time; for turbulent Spirits will shew themselves active to purpose, but let such evil Agents know, that Presumption is the High way to Destruction: The Divine hand of Providence divert it from *Great Britain*, even to the remote Parts of the Universe. And all these four Planets are in square to *Jupiter*, and he in quartile to his Dispositor, this shews as if some great Clergy-man, States man, or Lawyer to be under the Frowns of Fate, high Crimes and Accusations laid to his charge, and cannot see how he will come off; his Dispositor sits as Judge, and altho he hath long rid upon the Wings of Honour and Fame, is now near a Catastrophe.

The Autumnal Scheme.

IN this Autumnal Scheme, we find fixed Signs upon the Angles, quite different from that of the last Ingre where they were all moveable. Here is an angry Figure to give our Judgment upon ; for here is a Conjunction of Saturn and Mars in Cancer in the eleventh House. As *Haly* saith, it Saturn shall be in the Eleventh, unfortunate as now he is, *Homines habebunt Malum, Tristitias multas & destruentur eorum Fiducia & Rationes, nec complebuntur Petitiones ; & habebunt Gravitates, & defectum in Vita* fol. 370. That Men shall receive much Ill, and have many Sorrows, and that their Trust, Confidence, Hope, and Purposes shall be destroyed, neither shall their Petitions be accomplished ; and that they shall have Sadness, and want of Provisions. *Haly*, 371. *Si Mars fuerit in undecima, non amabunt se Homines, nec associabuntur, nec habebunt Amorem aut Pietatem unum cum alio.* Men will not love

one another, or will they associate together, viz. in Council; neither will one Man have any Civility or Affection, to another. These are to be understood of the highest Quality In the Courts of Princes, and in those Countries where War is already, or at present. The Conjunction of the two Malevolents in *Cancer*, signifies that there will be many Wars, Quarrels, Discords, and much Bloodshed in many parts; and as *Cancer* is a Northern Sign, and therefore signifies the Northern Parts of the World, as *Muscovia*, *Poland*, *Swedeland*, *Germany*, *Denmark*, &c. And that there will assuredly happen many Commotions, intestine Wars in those parts, and that there will be much Fierceness, Cruelty, barbarous & outrageous Actions perpetrated among Men, and little or no Pity, Compassion, or Mercy shown. It signifies Thieves, Murderers, Robbers by the High-way shall abound; Subjects shall prove unruly and disobedient to their Superiors, Servants to their Masters, & Friends and Relations will be perfidious and treacherous to each other. In *Astrologia Munda*, Lib. IV. Cap. 12. "The Conjunction of *Saturn* & *Mars* in *Cancer* is the forerunner of much Evil, viz. terrible Wars, Slaughter, Depopulation, and alteration of Government, Destruction of Kingdoms, Fire and Sword, Famine and Pestilence, &c. The Conjunction in any other Sign is not so terrible. And truly this is a terrible Conjunction if rightly considered; and dictated unto us upon the first Considerations, no less than horrible Troubles and Alteration in the World; if we but consider it, it is a Conjunction of the Malevolents, two Enemies must needs be stronger than one, and here they are both together, and in a Sign wherein *Jupiter*, our best Friend, is exalted, and the Moon, the Mother of Moisture, pitcheth her Tent, so that by their Conjunction therein, both the Assistance of the one, and the Nature of the other, is much damnified and afflicted; again *Saturn* is there in his detriment, it being the Sign opposite to his House, *Capricorn*; and *Mars* is there in his fall, *Capricorn* being the House of his exaltation; and therefore it is (these things being considered) that they are so mischievous, when joined in this Sign, the which of their Conjunction is the worst, &c. And as *Saturn* is Lord of the sixth and seventh

seventh Angles, so he signifies Diseases that are ingendred of much Phlegm, Coughs, stopping of the Stomach, Asthma or difficulty of Breathing, Agues. *Thesaurus Astrologie* pag. 71. saith, That *Saturn* worketh his Malice more vehemently in *Cancer* than in other Signs, because *Cancer* is his detriment in opposition to *Capricorn*, and *Cancer* is cold and moist, flegmatick, and doth augment the Cold and Flegm in *Saturn*, and makes him more venomous; for all Venom and Poison is *Saturn*, and he causes the greatest Venom in *Cancer*, and the second in *Scorpio*, and the least in *Pisces*. He ingenders Diseases of much Phlegm and mixt with thin Melancholy, causing Coughs, stopping of the Stomach, and shivering and pricking in the Stomach, the black Plague, by reason that the Blood is overcomen with Flegm and Water, &c.

Of the Eclipses.

FOUR times will the two great Luminaries of Heaven suffer an Eclipse this Year; twice of the Sun, and twice of the Moon, and they follow in order thus:

The first is an Eclipse of the Sun, but invisible to us, it happens on the eleventh day of *March*, about 6 a clock in the Morning.

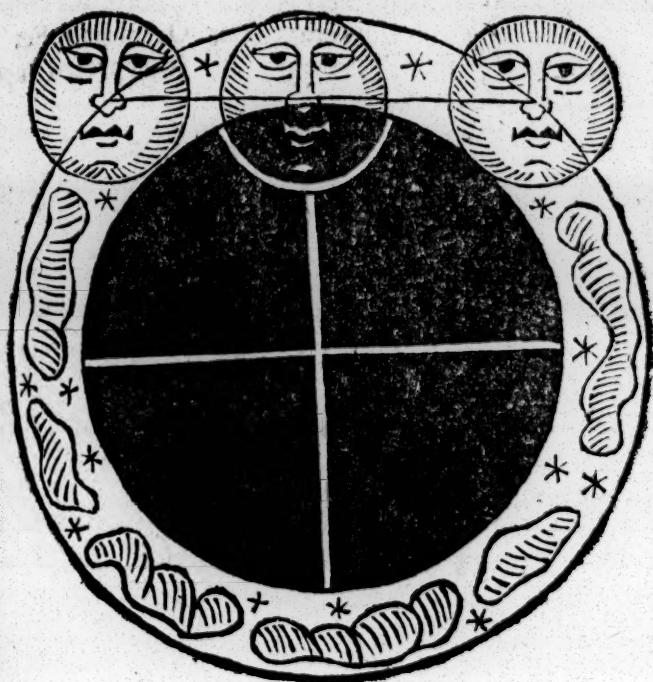

The second is an Eclipse of the Moon, on the 25th day of *March*, about 5 in the Morning, the Moon sets eclipsed here. It may be seen in *Ireland* and in the *Atlantick Ocean* and those Places that lie in the Longitude of 300 degrees may see it in their Meridian, as *Cuba*, *Jamaica*, and our Western Plantations.

The third is an Eclipse of the Sun, and may be seen if the Air be clear, on *Friday* the third of *September*, it is but a small Eclipse.

The fourth is an Eclipse of the Moon, on the 18th day of *September*, about 9 at Night.

IT signifies unto Men Imprisonments, Captivities; and threatens Depopulation, and Slaughters of Men, and causeth the Wrath of great Men, Sicknes, Tertian Fevers, and sudden Deaths; excites Men to Thefts, Robberies upon the Highways, Rebellion against their Superiors, and the like. In the Air, it irritates impetuous Winds, and a troubled Air, high, turbulent and destructive Winds, doing much harm both by Sea and Land.

And not only this, but sundry Dissensions and Contradictions to happen among the Grandees of the Earth, sundry secret Murders and treacherous Practices, likewise great Oppositions in Councils, and many serpentine, crafty Debates. Wars, Controversies, Land-Battles, between Kingdom and Kingdom, Countrey and Countrey, &c.
